Projects

Sound cloud clone | Newton school (link)   September 2023 - October 2023
Features:
• Implemented robust user authentication and authorization via JWT tokens, covering login, signup, and password updates.
• Enhanced user experience with pagination and the ability to manage favorite songs.
• Users can create accounts where they can manage their uploaded tracks, playlists.
• Provide an advanced search feature to help users find specific songs.
Tech Stack: React, Redux, JavaScript, JWT, HTML, CSS, Bootstrap.
Description: SoundClone is a music streaming web application that I developed to showcase my skills in front-end development. It features a user-friendly interface, user authentication, audio playback, and various interactive functionalities, enhancing the user's music streaming experience. This project allowed me to demonstrate my proficiency in React, Redux, and web development best practices.

Beyoung shopping website | Newton school (link)   October 23 - November 23
Features:
• Implemented user authentication and authorization via JWT tokens, covering login, signup, and password updates.
• Provide an advanced search feature to help users find specific product.
• Enhanced user experience with pagination and the ability to manage favorite products and also add in Wishlist .
• Users can track there products .
Tech Stack: React, Redux, JavaScript, JWT, HTML, CSS, Bootstrap, chakra-ui, material-ui.
Description: I built a website that works a lot like Beyoung shopping website. I made sure it had all the same cool stuff for users to browse and buy things easily. Using modern tools like React.js , redux, I created features like user logins, a big list of products, ways to track orders. I spent time testing everything to make sure it worked great on phones and computers.

Skills

Computer languages	HTML, CSS, Javascript, Java
Software Packages	Bootstrap, React
Additional Courses Taken	Data Structure
Soft Skills	Team Building, Decision-making, Teamwork, Communication Skills
